Subject: Origin of Milk Supply for Driftwood Dairy Products

I am writing to clarify the origin of the milk supply used in the production of various dairy products at Driftwood Dairy in El Monte, California.

All milk sold to Driftwood Dairy is exclusively sourced from dairy farms within the state of California. Our milk comes from dairies located within a 200-mile radius of the Driftwood Dairy processing plant. Driftwood milk proudly carries the "Real California Milk" seal, signifying its origin and commitment to quality.

At Driftwood Dairy, we prioritize sourcing locally to support our community of California dairy farmers and ensure the freshness and excellence of our products.

Thank you for your attention to this matter.

Warm regards,

A handwritten signature in black ink, appearing to read "John Dolan". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

John Dolan
VP Sales
Driftwood Dairy, Inc.
